Reasons for Allowance

Claims 1-3 are allowed for the reason the prior art does not teach determining the amount of the black component between the starting point and the vertex showing the black by linearly increasing the black component from the starting point to the vertex showing the black, independently of the complementary color component corresponding to the chromatic color and determining the amount of the complementary color component based on the determined amount of the black component.

Claims 4 and 9 were previously indicated as being allowed in the office action mailed 2-7-2005.

Claim 8 is allowed for the reason the prior art does not teach or suggest, "... determining the amount of the black component between the starting point and the vertex showing the black by linearly increasing the black component from the starting point to the vertex showing the black, independently of the complementary color component corresponding to the chromatic color and determining the amount of the complementary color component based on the determined amount of the black component."

Claims 11-13 are allowed for the reason the prior art does not teach or suggest, "... determining the amount of the dark color component between the starting point and the vertex showing the black by linearly increasing the dark color component from the starting point to the maximum value of the dark color component, independently of the light color component and determining the amount of the light color component based on the determined amount of the dark color component.""

Claim 14 is allowed for the reason the prior art does not teach or suggest in claimed combination, "... determining the amount of the dark color component between the starting point and the vertex showing the black by linearly increasing the dark color component from the starting point to the maximum value of the dark color component and determining the amount of the light color component based on the determined amount of the dark color component.
